Block House Municipal Utility District  
Customer Service Agreement

### I. PURPOSE

The Block House Municipal Utility District (the "Water System") is responsible for protecting the drinking water supply from contamination or pollution that could result from improper plumbing practices. The purpose of this Customer Service Agreement (the "Agreement") is to notify each customer of the plumbing restrictions that are in place to provide this protection. The utility enforces these restrictions to ensure the public health and welfare. Each customer must sign this Agreement before the Block House Municipal Utility District will begin service. In addition, when service to an existing connection has been suspended or terminated, the Water System will not re-establish service unless it has a signed copy of this Agreement.

### II. PLUMBING RESTRICTIONS

The following unacceptable plumbing practices are prohibited by State regulations.

- A. No direct connection between the public drinking water supply and a potential source of contamination is permitted. Potential sources of contamination shall be isolated from the public water system by an air-gap or an appropriate backflow prevention device.
- B. No cross-connection between the public drinking water supply and a private water system is permitted. These potential threats to the public drinking water supply shall be eliminated at the service connection by the installation of an air-gap or a reduced pressure-zone backflow prevention device.
- C. No connection that allows water to be returned to the public water supply is permitted.
- D. No pipe or pipe fitting which contains more than 8.0% lead may be used for the installation or repair of plumbing at any connection that provides water for human use.
- E. No solder or flux that contains more than 0.2% lead can be used for the installation or repair of plumbing at any connection that provides water for human use.

### III. CUSTOMER SERVICE AGREEMENT

The following are the terms of the Customer Service Agreement between the Block House Municipal Utility District and \_\_\_\_\_ (the "Customer").

- A. The Water System will maintain a copy of this Agreement as long as the Customer and/or the premises is connected to the Water System.
- B. The Customer shall allow his property to be inspected for possible cross-connections and other unacceptable plumbing practices. These inspections shall be conducted by the Water System or its designated agent prior to initiating new water service; when there is reason to believe that cross-connections or other unacceptable plumbing practices exist; or after any major changes to the private plumbing facilities. The inspections shall be conducted during the Water System's normal business hours.
- C. The Water System shall notify the Customer in writing of any cross-connection or other unacceptable plumbing practice that has been identified during the initial inspection or the periodic reinspection.
- D. The Customer shall immediately correct any unacceptable plumbing on his premises.
- E. The Customer shall, at his expense, properly install, test, and maintain any backflow prevention device required by the Water System. Copies of all testing and maintenance shall be provided to the Water System.

### IV. ENFORCEMENT

If the Customer fails to comply with the terms of the Customer Service Agreement, the Water System shall, at its option, either terminate service or properly install, test, and maintain an appropriate backflow prevention device at the service connection. Any expenses associated with the enforcement of this Agreement shall be billed to the customer.
